Pacificaze are a guitar-driven band known for their cinematic, sun-soaked sound, blending emotional weight with forward-moving energy.

Their new single "**Pages**" leans into the more expansive side of their identity, favouring atmosphere and depth over immediacy.

Built around a steady rhythmic pulse, layered guitars and a gradual dynamic lift, "**Pages**" explores themes of overthinking, self-reflection and forward motion. The track unfolds with quiet intensity before opening into a widescreen release, capturing the moment of clarity when you begin to take control of your own story.

Balancing restraint with scale, Pacificaze create music that feels immersive and transportive, designed to grow with each listen rather than hit instantly.

With previous support from **Absolute Radio**, **BBC Introducing** and **ALLSAINTS**, alongside a debut performance at **Glastonbury** and live shows supporting **The Subways**, Pacificaze continue to build a reputation as a compelling and distinctive guitar band, with an upcoming support slot for **Billy Bibby** on his Catfish and the Bottlemen 10 year anniversary of **The Balcony Tour**.
